

On-Farm Energy Generation

Securing revenue streams from land based energy.

22nd – 23rd June 2011, Stoneleigh Park, Warwickshire

Farmers and landowners have a rare opportunity – to be part of the drive to renewable energy, whilst securing new found income sources as micro energy generators. Different farms will have different resources and potential – assess what the opportunities are for you and your land at this essential event.

On-Farm Energy Generation provides a detailed analysis of government policy, incentives, planning, technological advancements and financing. The event will enable land owners to gain valuable information on the range of technologies available for on-farm energy generation, as well as other issues that will influence investment decisions.

With key speakers, industry experts and innovative farmers providing practical case studies, On-Farm Energy Generation brings you all the information essential for the development of renewable energy on your farm.

This event is run in association with the Royal Agricultural Society of England and its members are entitled to a 20% discount off delegate places at the event.
